Setting High Standards in Solenoid Valve Technology

- Wide Variety of Valves to Fit Your Needs
- World Class Customer Service
- High Quality Valves at Competitive Prices
- Higher Standards At No Extra Cost
- Technically Trained Representatives
- Better Delivery of Custom Solutions
- Global Approvals
- Service and Repair

Fluid Control Systems

Internally piloted and direct acting Solenoid valves for aggressive media with unique pivoting armature design and isolating diaphragms.

Take your business to higher standards and improve your process with Burkert!

Direct acting solenoid valves for neutral liquids and gasses.

Internally piloted solenoid valves for neutral liquids and gasses with pressures as high as 700 PSI.

Attention to detail and quality has made Burkert Fluid Control Systems the innovative leader in solenoid valve sales. At Burkert, we strive to bring you the same superior quality and service that we have been providing the world for over 50 years. Our solenoid valves have continuously proven to outlast other leading solenoid valve manufacturers, time after time.

We pride ourselves on putting our customers first and are committed to fulfilling your application requirements with customized solutions, such as valve manifold systems and solenoid valve systems designed to accurately meet your process requirements. Whether you are controlling flow, pressure, temperature, pH or level of the process media, we have the correct valve, controller and sensor to meet your needs.

Burkert offers a wide range of ON/OFF and proportional solenoid valves in order to fulfill all of your application requirements. Our valves have been engineered with innovative features that include:

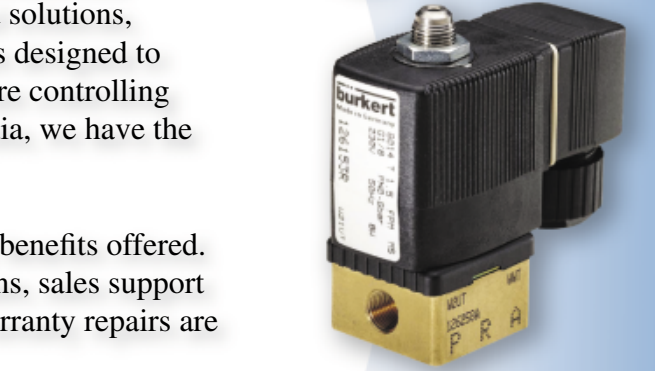

Our unmatched product reliability is only one of the many benefits offered. Burkert has an impressive team of highly trained technicians, sales support personnel and distributors at your disposal. Service and warranty repairs are also available.

- Standard Fluorocarbon (VITON) seals at no extra cost.
- Double o-ring seals that prevent corrosion build up between the coil and core tube, resulting in extended life and increased performance.
- Standard class H coils on all UL listed valves.
- Unique pivoting armature and rocker designs with life cycle ratings up to 200 MILLION CYCLES.
- Isolating diaphragms that allow the on/off control of aggressive fluids.
- A wide range of electrical connectors, such as 1/2" conduit connectors, molded cable plugs, LED cable plugs, pre-wired cable plugs and cable plugs with built-in surge suppressors and bridge rectifiers.
- Global standards: UL, CSA, FM, ATEX, and more.

Take your business to higher standards and improve your process with Burkert.
